We’re excited to introduce VIBE, our new product line of cloths and towels made from 85% post-consumer recycled materials.

Transparency has always been important to us, which is why we’ve opted to partner with outside organizations to ensure the authenticity of the VIBE promise of sustainability. We work only with suppliers who have been verified with the Global Recycled Standard (GRS), and our products are certified safe for humans by OEKO-TEX® STANDARD 100.

Our supply chain partners source the highest-quality post-consumer recycled material that is highly absorbent and feels good in your hands. And this material takes dye particularly well, allowing us to offer bold, dual-sided designs.

We’re also happy to share that we’ve expanded our existing product lines with new trend-setting colors and styles for 2025—including a whole new line of seasonal prints.
